APEX BENEFITS RELEASES ApexRx TO REDUCE PHARMACY BENEFITS COSTS
New ApexRx solution to help employers save up to 30% on pharmacy benefits

(Indianapolis, Indiana – May 16, 2018) – Apex Benefits recently expanded its range of employee benefits offerings, providing client access to *ApexRx*, a new solution to help employers reduce the cost of pharmacy benefits. Apex Benefits is providing clients with access to *ApexRx* beginning today.

With pharmacy costs approaching 20% of total healthcare costs and rising steadily each year, Apex Benefits recognizes the need to disrupt market trends for its clients. *ApexRx* helps uncover, and even eliminate, many of the hidden revenues often retained by pharmacy benefit managers (PBMs) under traditional arrangements. Most *ApexRx* clients will achieve 10%-30% first year savings over the current cost of their pharmacy benefit¹.

Apex Benefits is the first and only benefits consultant in Indiana to invest in a team of Certified Pharmacy Benefits Specialists (CPBS™). Employers may request a complimentary *ApexRx* PBM contract assessment and health score. The *ApexRx* CPBS team uses enhanced negotiation, sourcing and contracting to secure and implement a stronger and transparent PBM agreement. *ApexRx* offers a range of customized monitoring and market check features to ensure employers receive what they paid for.

“*ApexRx* is an essential service for any employer struggling with rising drug costs. *ApexRx* ensures employers pay a fair price for PBM services and the lowest possible price for medications,” John Gause, President and CEO of Apex Benefits said.

Employers interested in reducing pharmacy benefit costs in a sustainable manner and gaining greater transparency in their PBM relationship may contact the *ApexRx* team at **ApexRx@apexbg.com**.

¹Percentage depends upon a client's current contract and benefit design, covered population, medication mix and current market pricing.

About Apex

Apex Benefits is dedicated exclusively to the management of group health and welfare plans. Our team empowers organizations to make effective benefits decisions through data-driven decision modeling, health-focused employee engagement and human capital strategies.
